

CONTENTS

A Note from the Authors vi

1 What Is Statistics? 1

- Introduction 2
- Why Study Statistics? 2
- What Is Meant by Statistics? 3
- Types of Statistics 4
 - Descriptive Statistics 4
 - Inferential Statistics 5
- Types of Variables 6
- Levels of Measurement 7
 - Nominal-Level Data 8
 - Ordinal-Level Data 8
 - Interval-Level Data 9
 - Ratio-Level Data 10
- EXERCISES** 12
- Ethics and Statistics 12
- Basic Business Analytics 13
- Chapter Summary 14
- Chapter Exercises 14
- Data Analytics 18

2 Describing Data: Frequency Tables, Frequency Distributions, and Graphic Presentation 19

- Introduction 20
- Constructing Frequency Tables 20
 - Relative Class Frequencies 21
- Graphic Presentation of Qualitative Data 22
- EXERCISES** 26
- Constructing Frequency Distributions 27
 - Relative Frequency Distribution 32
- EXERCISES** 33
- Graphic Presentation of a Distribution 34
 - Histogram 34
 - Frequency Polygon 37
- EXERCISES** 39
- Cumulative Distributions 40
- EXERCISES** 43
- Chapter Summary 44

- Chapter Exercises 45
- Data Analytics 52

3 Describing Data:

- Numerical Measures** 54
- Introduction 55
- Measures of Location 55
 - The Population Mean 56
 - The Sample Mean 57
 - Properties of the Arithmetic Mean 58
- EXERCISES** 59
 - The Median 60
 - The Mode 62
 - Software Solution 64
- EXERCISES** 65
 - The Relative Positions of the Mean, Median, and Mode 66
- EXERCISES** 68
- The Weighted Mean 69
- EXERCISES** 70
- The Geometric Mean 70
- EXERCISES** 73
- Why Study Dispersion? 74
 - Range 74
 - Variance 75
- EXERCISES** 77
 - Population Variance 78
 - Population Standard Deviation 80
- EXERCISES** 80
 - Sample Variance and Standard Deviation 81
 - Software Solution 82
- EXERCISES** 83
- Interpretation and Uses of the Standard Deviation 83
 - Chebyshev's Theorem 83
 - The Empirical Rule 84
- EXERCISES** 86
- Ethics and Reporting Results 86
- Chapter Summary 87
- Pronunciation Key 88

Chapter Exercises 88

Data Analytics 92

4 Describing Data:

Displaying and Exploring Data 93

Introduction 94

Dot Plots 94

EXERCISES 97

Measures-of Position 97

EXERCISES 101

Box Plots 102

EXERCISES 105

Skewness 106

EXERCISES 109

Describing the Relationship between Two Variables 110

Correlation Coefficient 111

Contingency Tables 113

EXERCISES 115

Chapter Summary 116

Pronunciation Key 117

Chapter Exercises 117

Data Analytics 123

A REVIEW OF CHAPTERS 1–4 123

PROBLEMS 124

CASES 126

PRACTICE TEST 127

5 A Survey of Probability Concepts

Introduction 131

What Is a Probability? 132

Approaches to Assigning Probabilities 134

Classical Probability 134

EXERCISES 140

Empirical Probability 140

Subjective Probability 142

EXERCISES 143

Rules of Addition for Computing Probabilities 145

Special Rule of Addition 145

Complement Rule 146

The General Rule of Addition 148

EXERCISES 150

Rules of Multiplication to Calculate Probability 151

Special Rule of Multiplication 151

General Rule of Multiplication 152

Contingency Tables 154

Tree Diagrams 157

EXERCISES 160

Bayes' Theorem 161

EXERCISES 165

Chapter Summary 166

Pronunciation Key 167

Chapter Exercises 167

Data Analytics 172

6 Discrete Probability Distributions

Introduction 175

What Is a Probability Distribution? 175

Random Variables 177

Discrete Random Variable 178

Continuous Random Variable 179

The Mean, Variance, and Standard Deviation of a Discrete Probability Distribution 180

Mean 180

Variance and Standard Deviation 180

EXERCISES 182

Binomial Probability Distribution 184

How Is a Binomial Probability Computed? 186

Binomial Probability Tables 188

EXERCISES 191

Cumulative Binomial Probability Distributions 192

EXERCISES 194

Hypergeometric Probability Distribution 194

EXERCISES 198

Poisson Probability Distribution 198

EXERCISES 203

Chapter Summary 203

Chapter Exercises 204

Data Analytics 209

7 Continuous Probability Distributions

Introduction 211

The Family of Uniform Probability Distributions 211

EXERCISES	215
The Family of Normal Probability Distributions	216
The Standard Normal Probability Distribution	218
The Standard Normal Distribution	219
Applications of the Standard Normal Distribution	220
EXERCISES	224
EXERCISES	228
EXERCISES	231
The Empirical Rule	231
EXERCISES	233
The Family of Exponential Distributions	234
EXERCISES	238
Chapter Summary	239
Chapter Exercises	240
Data Analytics	243

A REVIEW OF CHAPTERS 5–7	244
PROBLEMS	244
CASES	246
PRACTICE TEST	247

8 Sampling, Sampling Methods, and the Central Limit Theorem 249

Introduction	250
Research and Sampling	250
Sampling Methods	251
Simple Random Sampling	251
Systematic Random Sampling	254
Stratified Random Sampling	255
Cluster Sampling	256
EXERCISES	257
Sample Mean as a Random Variable	259
Sampling Distribution of the Sample Mean	260
EXERCISES	264
The Central Limit Theorem	265
Standard Error of the Mean	271
EXERCISES	271
Using the Sampling Distribution of the Sample Mean	273
EXERCISES	275
The Sampling Distribution of the Sample Proportion	275

EXERCISES	277
Chapter Summary	278
Pronunciation Key	279
Chapter Exercises	279
Data Analytics	285

9 Estimation and Confidence Intervals 286

Introduction	287
Point Estimate for a Population Mean	287
Confidence Intervals for a Population Mean	288
Population Standard Deviation, Known σ	289
A Computer Simulation	293
EXERCISES	296
Population Standard Deviation, σ Unknown	296
EXERCISES	304
A Confidence Interval for a Population Proportion	305
EXERCISES	308
Finite-Population Correction Factor	309
EXERCISES	311
Choosing an Appropriate Sample Size	311
Sample Size to Estimate a Population Mean	312
Sample Size to Estimate a Population Proportion	313
EXERCISES	314
Chapter Summary	315
Chapter Exercises	316
Data Analytics	320

A REVIEW OF CHAPTERS 8–9	321
PROBLEMS	322
CASES	323
PRACTICE TEST	323

10 One-Sample Tests of Hypothesis 325

Introduction	326
What Is Hypothesis Testing?	326
Six-Step Procedure for Testing a Hypothesis	327
Step 1: State the Null Hypothesis (H_0) and the Alternate Hypothesis (H_1)	327
Step 2: Select a Level of Significance	328
Step 3: Select the Test Statistic	328

- Step 4: Formulate the Decision Rule 329
- Step 5: Make a Decision 330
- Step 6: Interpret the Result 332

One-Tailed and Two-Tailed Hypothesis Tests 333

Hypothesis Testing for a Population Mean: Known Population Standard Deviation 334

- A Two-Tailed Test 334
- A One-Tailed Test 338

p -Value in Hypothesis Testing 339

EXERCISES 340

Hypothesis Testing for a Population Mean: Population Standard Deviation Unknown 341

EXERCISES 344

- A Statistical Software Solution 346

EXERCISES 348

Type II Error 349

EXERCISES 353

Test a Hypothesis of a Population Proportion 353

EXERCISES 356

Chapter Summary 357

Pronunciation Key 358

Chapter Exercises 358

Data Analytics 363

11 Two-Sample Tests of Hypothesis 364

Introduction 365

Comparing Two Population Variances 365

- The F -Distribution 365
- Testing a Hypothesis of Equal Population Variances 366

EXERCISES 370

Two-Sample Tests of Hypothesis: Independent Samples 371

EXERCISES 376

Comparing Population Means with Estimated Population Standard Deviations 377

- Two-Sample Pooled Test 378

EXERCISES 382

- Unequal Population Standard Deviations 384

EXERCISES 387

Two-Sample Tests of Hypothesis: Dependent Samples 388

Comparing Dependent and Independent Samples 391

EXERCISES 394

Two-Sample Tests about Proportions 395

EXERCISES 399

Chapter Summary 400

Pronunciation Key 402

Chapter Exercises 402

Data Analytics 412

12 Analysis of Variance 413

Introduction 414

ANOVA: Analysis of Variance 414

- ANOVA Assumptions 414
- The ANOVA Test 416

EXERCISES 423

Inferences about Pairs of Treatment Means 424

EXERCISES 427

Two-Way Analysis of Variance 429

EXERCISES 433

Two-Way ANOVA with Interaction 434

- Interaction Plots 435
- Testing for Interaction 436
- Hypothesis Tests for Interaction 437

EXERCISES 440

Chapter Summary 441

Pronunciation Key 442

Chapter Exercises 442

Data Analytics 453

A REVIEW OF CHAPTERS 10–12 453

PROBLEMS 454

CASES 457

PRACTICE TEST 457

13 Correlation and Linear Regression 459

Introduction 460

What Is Correlation Analysis? 460

The Correlation Coefficient 463

EXERCISES 468

- Testing the Significance of the Correlation Coefficient 470

EXERCISES 473

Regression Analysis 474

Least Squares Principle 474
 Drawing the Regression Line 477

EXERCISES 480

Testing the Significance of the Slope 482

EXERCISES 484

Evaluating a Regression Equation's Ability to Predict 485

The Standard Error of Estimate 485
 The Coefficient of Determination 486

EXERCISES 487

Relationships among the Correlation Coefficient, the Coefficient of Determination, and the Standard Error of Estimate 487

EXERCISES 489

Interval Estimates of Prediction 490

Assumptions Underlying Linear Regression 490
 Constructing Confidence and Prediction Intervals 491

EXERCISES 494

Transforming Data 494

EXERCISES 498

Chapter Summary 499

Pronunciation Key 500

Chapter Exercises 501

Data Analytics 510

14 Multiple Regression Analysis 511

Introduction 512

Multiple Regression Analysis 512

EXERCISES 516

Evaluating a Multiple Regression Equation 518

The ANOVA Table 518
 Multiple Standard Error of Estimate 519
 Coefficient of Multiple Determination 520
 Adjusted Coefficient of Determination 521

EXERCISES 522

Inferences in Multiple Linear Regression 522

Global Test: Testing the Multiple Regression Model 522
 Evaluating Individual Regression Coefficients 525

EXERCISES 528

Evaluating the Assumptions of Multiple Regression 529

Linear Relationship 530
 Variation in Residuals Same for Large and Small y Values 531

Distribution of Residuals 532
 Multicollinearity 532
 Independent Observations 534

Qualitative Independent Variables 535

Regression Models with Interaction 538

Stepwise Regression 540

EXERCISES 542

Review of Multiple Regression 544

Chapter Summary 551

Pronunciation Key 552

Chapter Exercises 553

Data Analytics 563

A REVIEW OF CHAPTERS 13–14 564

PROBLEMS 565

CASES 566

PRACTICE TEST 567

15 Nonparametric Methods

Nominal Level Hypothesis Tests 569

Introduction 570

Goodness-of-Fit Tests: Comparing Observed and Expected Frequency Distributions 570

Hypothesis Test of Equal Expected Frequencies 570

EXERCISES 575

Hypothesis Test of Unequal Expected Frequencies 577

Limitations of Chi-Square 578

EXERCISES 580

Testing the Hypothesis That a Distribution Is Normal 581

EXERCISES 584

Contingency Table Analysis 585

EXERCISES 588

Chapter Summary 589

Pronunciation Key 590

Chapter Exercises 590

Data Analytics 594

16 Nonparametric Methods:

Analysis of Ordinal Data 596

Introduction	597
The Sign Test	597
EXERCISES	601
Testing a Hypothesis About a Median	602
EXERCISES	604
Wilcoxon Signed-Rank Test for Dependent Populations	604
EXERCISES	608
Wilcoxon Rank-Sum Test for Independent Populations	609
EXERCISES	613
Kruskal-Wallis Test: Analysis of Variance by Ranks	613
EXERCISES	617
Rank-Order Correlation	619
Testing the Significance of r_s	622
EXERCISES	622
Chapter Summary	624
Pronunciation Key	625
Chapter Exercises	625
Data Analytics	628

A REVIEW OF CHAPTERS 15–16	629
PROBLEMS	630
CASES	631
PRACTICE TEST	631

17 Index Numbers 633

Introduction	634
Simple Index Numbers	635
Why Convert Data to Indexes?	638
Construction of Index Numbers	639
EXERCISES	640
Unweighted Indexes	641
Simple Average of the Price Indexes	641
Simple Aggregate Index	642
Weighted Indexes	642
Laspeyres Price Index	642
Paasche Price Index	644
Fisher's Ideal Index	645
EXERCISES	646
Value Index	647
EXERCISES	648
Special-Purpose Indexes	649

Consumer Price Index	650
Producer Price Index	651
Dow Jones Industrial Average (DJIA)	651
EXERCISES	653
Consumer Price Index	653
Special Uses of the Consumer Price Index	654
Shifting the Base	657
EXERCISES	659
Chapter Summary	660
Chapter Exercises	661
Data Analytics	665

18 Forecasting with Time Series Analysis 666

Introduction	667
Time Series Patterns	667
Trend	667
Seasonality	669
Cycles	670
Irregular Component	670
EXERCISES	671
Modeling Stationary Time Series: Forecasts Using Simple Moving Averages	671
Forecasting Error	672
EXERCISES	676
Modeling Stationary Time Series: Simple Exponential Smoothing	677
EXERCISES	681
Modeling Time Series with Trend: Regression Analysis	682
Regression Analysis	684
EXERCISES	690
The Durbin-Watson Statistic	691
EXERCISES	696
Modeling Time Series with Seasonality: Seasonal Indexing	697
EXERCISES	705
Chapter Summary	707
Chapter Exercises	707
Data Analytics	711
A REVIEW OF CHAPTERS 17–18	713
PROBLEMS	714
PRACTICE TEST	715

19 Statistical Process Control and Quality Management 716

- Introduction 717
- A Brief History of Quality Control 717
 - Six Sigma 720
- Sources of Variation 720
- Diagnostic Charts 721
 - Pareto Charts 721
 - Fishbone Diagrams 723
- EXERCISES** 724
- Purpose and Types of Quality Control Charts 724
 - Control Charts for Variables 725
 - Range Charts 728
- In-Control and Out-of-Control Situations 730
- EXERCISES** 731
- Attribute Control Charts 732
 - p -Charts 732
 - c -Bar Charts 735
- EXERCISES** 737
- Acceptance Sampling 738
- EXERCISES** 741
- Chapter Summary 741
- Pronunciation Key 742
- Chapter Exercises 743

20 An Introduction to Decision Theory 1

- Introduction 2
- Elements of a Decision 2
- Decision Making under Conditions of Uncertainty 3
 - Payoff Table 3
 - Expected Payoff 4

- EXERCISES** 5
- Opportunity Loss 6
- EXERCISES** 7
 - Expected Opportunity Loss 7
- EXERCISES** 8
- Maximin, Maximax, and Minimax Regret Strategies 8
- Value of Perfect Information 9
- Sensitivity Analysis 10
- EXERCISES** 11
- Decision Trees 12
- Chapter Summary 13
- Chapter Exercises 14

APPENDIXES 747

- Appendix A: Data Sets* 748
- Appendix B: Tables* 758
- Appendix C: Answers to Odd-Numbered Chapter Exercises* 776
