Plan of the book xx

Part One Innovation management 1

1 Innovation management: an introduction 2

The importance of innovation 4
The study of innovation 7
Two traditions of innovation studies: Europe and the USA 9
Recent and contemporary studies 10
The need to view innovation in an organisational context 10
Individuals in the innovation process 12
Problems of definition and vocabulary 12
Entrepreneurship 13
Design 13
Innovation and invention 15
Successful and unsuccessful innovations 16
Different types of innovation 16
Technology and science 18
Popular views of innovation 20
Models of innovation 21
Serendipity 21
Linear models 22
Simultaneous coupling model 23
Architectural innovation 23
Interactive model 24
Innovation life cycle and dominant designs 25
Open innovation and the need to share and exchange knowledge (network models) 26
Doing, using and interacting (DUi) mode of innovation 27
Discontinuous innovation – step changes 28
Innovation as a management process 30
A framework for the management of innovation 30
New skills 33
Innovation and new product development 34
Case study: How Airpods helped Apple’s wearables division become the third largest within the company 35
2 National systems of innovation and entrepreneurship

Innovation in its wider context
The role of the state and national 'systems' of innovation
Why firms depend on the state for so much
How national states can facilitate innovation
National scientific capacity and R&D offshoring
The impact of the economic crisis on innovation
Fostering innovation in the United States and Japan
Triple Helix of university–industry–government relationships that drives innovation
The right business environment is key to innovation
Waves of innovation and growth: historical overview
Fostering innovation in 'late-industrialising' countries
Innovation within the European Union states
Entrepreneurship
Entrepreneurship and innovation
Defining entrepreneurship
Technological entrepreneurship: a question of context
Science and technology policy
Small and medium-sized enterprise
Innovation policy
Entrepreneurship policy
Case study: How Israel became water self-sufficient with advanced technology

3 Public sector innovation

The importance of the public sector
What is public sector innovation (PSI) and why do we need it?
Is there really innovation in government?
Information systems, e-government and digital government
Social media
Differences between private and public sector innovation
Organisations and innovation 106
The dilemma of innovation management 106
Innovation dilemma in low technology sectors 107
Dynamic capabilities 108
Managing uncertainty 108
Pearson's uncertainty map 109
Applying the uncertainty map in practice 111
Managing innovation projects 112
Organisational characteristics that facilitate the innovation process 114
Growth orientation 117
Organisational heritage and innovation experience 118
Vigilance and external links 118
Commitment to technology and R&D intensity 119
Acceptance of risks 119
Cross-functional cooperation and coordination within organisational structure 119
Receptivity 119
Space for creativity 119
Strategy towards innovation 120
Diverse range of skills 120
Industrial firms are different: a classification 121
Organisational structures and innovation 123
Formalisation 124
Complexity 125
Centralisation 125
Organisational size 125
The role of the individual in the innovation process 125
IT systems and their impact on innovation 126
Management tools for innovation 129
Innovation management tools and techniques 130
Applying the tools and guidelines 132
Innovation audit 133

Case study: Gore-Tex® and W.L. Gore & Associates: an innovative company and a contemporary culture 134

7 Managing organisational knowledge                                      | 214  |
| The Battle of Trafalgar                                                | 216  |
| Technology trajectories                                                | 217  |
| The acquisition of firm-specific knowledge                            | 218  |
| The resource-based perspective                                        | 218  |
| Dynamic competence-based theory of the firm                            | 219  |
| Developing firm-specific competencies                                 | 221  |
| Competencies and profits                                               | 222  |
| Technology development and effort required                             | 223  |
| The knowledge base of an organisation                                 | 224  |
| The whole can be more than the sum of the parts                       | 225  |
| Organisational heritage                                               | 226  |
| When the performance of the organisation is greater than the abilities of individuals | 226  |
| Characterising the knowledge base of the organisation                 | 227  |
8 Strategic alliances and networks

Defining strategic alliances
The fall of the go-it-alone strategy and the rise of the octopus strategy
Complementary capabilities and embedded technologies
   Interfirm knowledge-sharing routines
Forms of strategic alliance
   Licensing
   Supplier relations
   Outsourcing
   Joint venture
   Collaboration (non-joint ventures)
   R&D consortia
   Industry clusters
   Low technology industry rely on networks for innovation
   Innovation networks
   The ‘virtual company’
Motives for establishing an alliance
The process of forming a successful strategic alliance
Risks and limitations with strategic alliances
The role of trust in strategic alliances
   The concept of trust
   Innovation risks in strategic outsourcing
   Eating you alive from the toes up
The use of game theory to analyse strategic alliances
Game theory and the prisoner’s dilemma
Use of alliances in implementing technology strategy
Case study: Pizza delivery with unmanned drones
Chapter summary 281  
Discussion questions 282  
Key words and phrases 282  
References 282  
Further reading 285

9 Research and development

What is research and development? 288  
The traditional view of R&D 289  
R&D management and the industrial context 289  
R&D investment and company success 291  
Classifying R&D 293  
The operations that make up R&D 294  
R&D management and its link with business strategy 295  
Integration of R&D 296  
Strategic pressures on R&D 298  
The technology portfolio 298  
The difficulty of managing capital-intensive production plants in a dynamic environment 300  
Which business to support and how? 300  
Skunk works 302  
Setting the R&D budget 303  
Evaluating R&D projects 305  
Evaluation criteria 305  
Case study: The long and difficult 13-year journey to the marketplace for Pfizer’s Viagra 309

Chapter summary 316  
Discussion questions 316  
Key words and phrases 317  
References 317  
Further reading 319

10 Open innovation and technology transfer

Background 322  
The dominant economic perspective 323  
Open innovation 324  
The paradox of openness 326  
The acquisition of external technology 326  
Level of control of technology required 328  
Introduction to technology transfer 329  
Information transfer and knowledge transfer 329  
Models of technology transfer 331  
Licensing 331  
Science park model 332
Part Three New product development

11 Business models

What is a business model? 357
The business model and the business plan 359
The range of business models 360
  The sixteen business model archetypes 361
  Revenue models 364
  Enterprise models 365
  Industry models 366
The parts of the business model 366
  The offering 367
  The customer side 367
  The infrastructure 368
  The finances 368
The business model dilemma of technology shifts 370
Considerations in designing a business model 371
  Switching costs 371
  Scalability 371
  Recurring revenues 372
  Cashflow 372
  Getting others to do the work 372
  Protecting the business from competitors 373
  Changing the cost structure 373
12 Market adoption and technology diffusion

- Time lag between innovation and useable product
- Innovation and the market
  - Innovation and market vision
  - Analysing internet search data to help adoption and forecasting sales
  - Innovative new products and consumption patterns
  - Marketing insights to facilitate innovation
  - Lead users
  - Users as innovators in the virtual world
  - Crowdsourcing for new product ideas
- Frugal innovation and ideas from everywhere
- Innovation diffusion theories
  - Beacon products
  - Seasonality in innovation diffusion
  - The Bass Diffusion Model
- Adopting new products and embracing change
  - Market adoption theories
- Case study: How three students built a business that could affect world trade

Chapter summary 412
Discussion questions 412
Key words and phrases 413
References 413
Further reading 415

13 New product development

- Innovation management and NPD
  - Product development as a series of decisions
- New products and prosperity
Considerations when developing an NPD strategy
  Ongoing corporate planning
  Ongoing market planning
  Ongoing technology management
  Opportunity analysis/serendipity
NPD as a strategy for growth
  Market penetration
  Market development
  Product development
  Diversification
  A range of product development opportunities
What is a new product?
  Defining a new product
  Classification of new products
  Repositioning and brand extensions
  New product development as an industry innovation cycle
Overview of NPD theories
  The fuzzy front end
  Customer cocreation of new products
  Time to market
  Agile NPD
Models of new product development
  Departmental-stage models
  Activity-stage models and concurrent engineering
  Cross-functional models (teams)
  Decision-stage models
  Conversion-process models
  Response models
  Network models
Case study: Umbrella wars: GustBuster® and senzo

Chapter summary
Discussion questions
Key words and phrases
References
Further reading

**Market research and its influence on new product development**

Market research and new product development
The purpose of new product testing
Testing new products
Techniques used in consumer testing of new products
  Concept tests
  Test centres
  Hall tests/mobile shops
  Product-use tests
  Trade shows

References
Further reading
Monadic tests
Paired comparisons
In-home placement tests
Test panels
When market research has too much influence
Discontinuous new products
Market research and discontinuous new products
Circumstances when market research may hinder the development
of discontinuous new products
Technology-intensive products
Breaking with convention and winning new markets
When it may be correct to ignore your customers
Striking the balance between new technology and market research
Using suppliers and lead users to improve product variety
The challenge for senior management
Case study: Dyson, Hoover and the bagless vacuum cleaner

Chapter summary
Discussion questions
Key words and phrases
References
Further reading

Managing the new product development process

New products as projects
The Valley of Death
The key activities that need to be managed
Assembling knowledge
The generation of business opportunities
Developing product concepts: turning business opportunities into
product concepts
The screening of business opportunities
New technology product blogs
Development of product prototypes
Technical testing
Market testing and consumer research
How virtual worlds can help real-world innovations
Market introduction
NPD across different industries
Organisational structures and cross-functional teams
Teams and project management
Functional structures
Matrix structures
Corporate venturing
Project management
Reducing product development times through computer-aided design
The marketing/R&D interface
High attrition rate of new products
