

CONTENTS

Preface to Eighth Edition xiv

LEARNING STAGE I

THE FUNDAMENTALS

Chapter 1	Foundations of Engineering Economy	2
1.1	Why Engineering Economy and the Time Value of Money are Important	3
1.2	Performing an Engineering Economy Study	5
1.3	Professional Ethics and Economic Decisions	7
1.4	Interest Rate and Rate of Return	10
1.5	Terminology and Symbols	14
1.6	Cash Flows: Estimation and Diagramming	15
1.7	Economic Equivalence	19
1.8	Simple and Compound Interest	22
1.9	Minimum Attractive Rate of Return	26
1.10	Introduction to Spreadsheet Use	27
	Chapter Summary	31
	Problems	31
	Exercises for Spreadsheets	35
	Additional Problems and FE Exam Review Questions	36
	Case Study—Cost of Electricity with Renewable Sources Added	37
Chapter 2	Factors: How Time and Interest Affect Money	38
PE	Progressive Example—The Steel Plant Case	39
2.1	Single-Amount Factors (F/P and P/F)	39
2.2	Uniform Series Present Worth Factor and Capital Recovery Factor (P/A and A/P)	43
2.3	Sinking Fund Factor and Uniform Series Compound Amount Factor (A/F and F/A)	46
2.4	Factor Values for Untabulated i or n Values	48
2.5	Arithmetic Gradient Factors (P/G and A/G)	50
2.6	Geometric Gradient Series Factors	58
2.7	Determining i or n for Known Cash Flow Values	61
	Chapter Summary	64
	Problems	64
	Exercises for Spreadsheets	68
	Additional Problems and FE Exam Review Questions	69
	Case Study—The Amazing Impact of Compound Interest	71
Chapter 3	Combining Factors and Spreadsheet Functions	72
3.1	Calculations for Uniform Series That Are Shifted	73
3.2	Calculations Involving Uniform Series and Randomly Placed Single Amounts	76
3.3	Calculations for Shifted Gradients	80
	Chapter Summary	86
	Problems	86
	Exercises for Spreadsheets	92
	Additional Problems and FE Exam Review Questions	93
	Case Study—Preserving Land for Public Use	94
Chapter 4	Nominal and Effective Interest Rates	96
PE	Progressive Example—The Credit Card Offer Case	97
4.1	Nominal and Effective Interest Rate Statements	98

4.2	Effective Annual Interest Rates	101
4.3	Effective Interest Rates for Any Time Period	107
4.4	Equivalence Relations: Payment Period and Compounding Period	108
4.5	Equivalence Relations: Single Amounts with $PP \geq CP$	109
4.6	Equivalence Relations: Series with $PP \geq CP$	111
4.7	Equivalence Relations: Single Amounts and Series with $PP < CP$	115
4.8	Effective Interest Rate for Continuous Compounding	116
4.9	Interest Rates That Vary Over Time	118
	Chapter Summary	120
	Problems	120
	Exercises for Spreadsheets	125
	Additional Problems and FE Exam Review Questions	125
	Case Study—Is Owning a Home a Net Gain or Net Loss Over Time?	127

LEARNING STAGE 2

BASIC ANALYSIS TOOLS

Chapter 5	Present Worth Analysis	130
	PE Progressive Example—Water for Semiconductor Manufacturing Case	131
5.1	Formulating Alternatives	131
5.2	Present Worth Analysis of Equal-Life Alternatives	133
5.3	Present Worth Analysis of Different-Life Alternatives	135
5.4	Future Worth Analysis	139
5.5	Capitalized Cost Analysis	140
	Chapter Summary	144
	Problems	144
	Exercises for Spreadsheets	149
	Additional Problems and FE Exam Review Questions	150
	Case Study—Comparing Social Security Benefits	152
Chapter 6	Annual Worth Analysis	154
6.1	Advantages and Uses of Annual Worth Analysis	155
6.2	Calculation of Capital Recovery and AW Values	157
6.3	Evaluating Alternatives by Annual Worth Analysis	159
6.4	AW of a Permanent Investment	161
6.5	Life-Cycle Cost Analysis	164
	Chapter Summary	168
	Problems	168
	Exercises for Spreadsheets	173
	Additional Problems and FE Exam Review Questions	175
	Case Study—Annual Worth Analysis—Then and Now	176
Chapter 7	Rate of Return Analysis: One Project	178
7.1	Interpretation of a Rate of Return Value	179
7.2	Rate of Return Calculation Using a PW or AW Relation	181
7.3	Special Considerations When Using the ROR Method	185
7.4	Multiple Rate of Return Values	186
7.5	Techniques to Remove Multiple Rates of Return	191
7.6	Rate of Return of a Bond Investment	197
	Chapter Summary	200
	Problems	200

	Exercises for Spreadsheets	205
	Additional Problems and FE Exam Review Questions	207
	Case Study—Developing and Selling an Innovative Idea	209
Chapter 8	Rate of Return Analysis: Multiple Alternatives	210
8.1	Why Incremental Analysis Is Necessary	211
8.2	Calculation of Incremental Cash Flows for ROR Analysis	211
8.3	Interpretation of Rate of Return on the Extra Investment	214
8.4	Rate of Return Evaluation Using PW: Incremental and Breakeven (Two Alternatives)	215
8.5	Rate of Return Evaluation Using AW	221
8.6	Incremental ROR Analysis of Multiple (More than Two) Alternatives	222
8.7	All-in-One Spreadsheet Analysis	226
	Chapter Summary	228
	Problems	228
	Exercises for Spreadsheets	233
	Additional Problems and FE Exam Review Questions	234
	Case Study—Performing ROR Analysis for 3D Printer and IIoT Technology	235
	Case Study—How a New Engineering Graduate Can Help His Father	236
Chapter 9	Benefit/Cost Analysis and Public Sector Economics	238
PE	Progressive Example—Water Treatment Facility #3 Case	239
9.1	Public Sector Projects	240
9.2	Benefit/Cost Analysis of a Single Project	245
9.3	Incremental B/C Analysis (Two Alternatives)	248
9.4	Incremental B/C Analysis of Multiple (More than Two) Alternatives	252
9.5	Service Sector Projects and Cost-Effectiveness Analysis	256
9.6	Ethical Considerations in the Public Sector	260
	Chapter Summary	261
	Problems	262
	Exercises for Spreadsheets	269
	Additional Problems and FE Exam Review Questions	270
	Case Study—Highway Lighting Options to Reduce Traffic Accidents	272

LEARNING STAGE 2

EPILOGUE: SELECTING THE BASIC ANALYSIS TOOL

LEARNING STAGE 3

MAKING BETTER DECISIONS

Chapter 10	Project Financing and Noneconomic Attributes	278
10.1	MARR Relation to the Cost of Capital	279
10.2	Debt-Equity Mix and Weighted Average Cost of Capital	281
10.3	Determination of the Cost of Debt Capital	283
10.4	Determination of the Cost of Equity Capital and the MARR	285
10.5	Effect of Debt-Equity Mix on Investment Risk	287
10.6	Multiple Attribute Analysis: An Introduction	290
10.7	Evaluation Measure for Multiple Attributes	294
	Chapter Summary	295
	Problems	296
	Exercises for Spreadsheets	301
	Additional Problems and FE Exam Review Questions	302
	Case Study—Expanding a Business—Debt vs. Equity Financing?	303

Chapter 11	Replacement and Retention Decisions	304
PE	Progressive Example—Keep or Replace the Kiln Case	305
11.1	Basics of a Replacement Study	306
11.2	Economic Service Life	308
11.3	Performing a Replacement Study	314
11.4	Additional Considerations in a Replacement Study	318
11.5	Replacement Study over a Specified Study Period	319
11.6	Replacement Value	324
	Chapter Summary	324
	Problems	325
	Exercises for Spreadsheets	331
	Additional Problems and FE Exam Review Questions	331
	Case Study—A Pumper System with an ESL Problem	333
Chapter 12	Independent Projects with Budget Limitation	334
12.1	An Overview of Capital Rationing among Projects	335
12.2	Capital Rationing Using PW Analysis of Equal-Life Projects	337
12.3	Capital Rationing Using PW Analysis of Unequal-Life Projects	339
12.4	Capital Budgeting Problem Formulation Using Linear Programming	341
12.5	Additional Project Ranking Measures	344
	Chapter Summary	346
	Problems	346
	Additional Problems and FE Exam Review Questions	351
Chapter 13	Breakeven and Payback Analysis	354
13.1	Breakeven Analysis for a Single Project	355
13.2	Breakeven Analysis Between Two Alternatives	359
13.3	Payback Analysis	362
13.4	More Breakeven and Payback Analysis on Spreadsheets	366
	Chapter Summary	369
	Problems	369
	Exercises for Spreadsheets	374
	Additional Problems and FE Exam Review Questions	375
	Case Study—Water Treatment Plant Process Costs	376

LEARNING STAGE 4

ROUNDING OUT THE STUDY

Chapter 14	Effects of Inflation	380
14.1	Understanding the Impact of Inflation	381
14.2	Present Worth Calculations Adjusted for Inflation	383
14.3	Future Worth Calculations Adjusted for Inflation	388
14.4	Capital Recovery Calculations Adjusted for Inflation	391
	Chapter Summary	392
	Problems	392
	Additional Problems and FE Exam Review Questions	398
	Case Study—Inflation Considerations for Stock and Bond Investments	399
Chapter 15	Cost Estimation and Indirect Cost Allocation	400
15.1	Understanding How Cost Estimation Is Accomplished	401
15.2	Unit Method	404
15.3	Cost Indexes	405

15.4	Cost-Estimating Relationships: Cost-Capacity Equations	408
15.5	Cost-Estimating Relationships: Factor Method	409
15.6	Indirect Cost Rates and Allocation: The Traditional Method	411
15.7	Activity-Based Costing (ABC) for Indirect Costs	415
15.8	Making Estimates and Maintaining Ethical Practices	417
	Chapter Summary	418
	Problems	418
	Additional Problems and FE Exam Review Questions	424
	Case Study—Indirect Cost Analysis of Medical Equipment Manufacturing Costs	425
	Case Study—Deceptive Acts Can Get You in Trouble	427
Chapter 16	Depreciation Methods	428
16.1	Depreciation Terminology	429
16.2	Straight Line (SL) Depreciation	432
16.3	Declining Balance (DB) and Double Declining Balance (DDB) Depreciation	433
16.4	Modified Accelerated Cost Recovery System (MACRS)	436
16.5	Determining the MACRS Recovery Period	440
16.6	Depletion Methods	441
	Chapter Summary	443
	Appendix	444
16A.1	Sum-of-Years-Digits (SYD) and Unit-of-Production (UOP) Depreciation	444
16A.2	Switching between Depreciation Methods	446
16A.3	Determination of MACRS Rates	449
	Problems	452
	Additional Problems and FE Exam Review Questions	455
	Appendix Problems	456
Chapter 17	After-Tax Economic Analysis	458
17.1	Income Tax Terminology and Basic Relations	459
17.2	Calculation of Cash Flow after Taxes	462
17.3	Effect on Taxes of Different Depreciation Methods and Recovery Periods	464
17.4	Depreciation Recapture and Capital Gains (Losses)	467
17.5	After-Tax Economic Evaluation	470
17.6	After-Tax Replacement Study	476
17.7	After-Tax Value-Added Analysis	479
17.8	After-Tax Analysis for International Projects	482
17.9	Value-Added Tax	484
	Chapter Summary	486
	Problems	487
	Additional Problems and FE Exam Review Questions	496
	Case Study—After-Tax Analysis for Business Expansion	497
Chapter 18	Sensitivity Analysis and Staged Decisions	498
18.1	Determining Sensitivity to Parameter Variation	499
18.2	Sensitivity Analysis Using Three Estimates	504
18.3	Estimate Variability and the Expected Value	505
18.4	Expected Value Computations for Alternatives	506
18.5	Staged Evaluation of Alternatives Using a Decision Tree	508
18.6	Real Options in Engineering Economics	512
	Chapter Summary	517
	Problems	517
	Additional Problems and FE Exam Review Questions	524
	Case Study—Sensitivity to the Economic Environment	525
	Case Study—Sensitivity Analysis of Public Sector Projects—Water Supply Plans	525

Chapter 19	More on Variation and Decision Making under Risk	528
19.1	Interpretation of Certainty, Risk, and Uncertainty	529
19.2	Elements Important to Decision Making under Risk	532
19.3	Random Samples	537
19.4	Sample Estimates: Mean and Standard Deviation	540
19.5	Monte Carlo Sampling and Simulation Analysis	547
	Chapter Summary	554
	Problems	554
	Additional Problems and FE Exam Review Questions	558
	Case Study—Using Simulation and Three-Estimate Sensitivity Analysis	559
 Appendix A	 Using Spreadsheets and Microsoft Excel®	 561
A.1	Introduction to Using Excel	561
A.2	Organization (Layout) of the Spreadsheet	563
A.3	Spreadsheet Functions Important to Engineering Economy (Alphabetical Order)	564
A.4	Goal Seek—A Tool for Breakeven and Sensitivity Analysis	572
A.5	Solver—An Optimizing Tool for Capital Budgeting, Breakeven, and Sensitivity Analysis	573
A.6	Error Messages	574
 Appendix B	 Basics of Accounting Reports and Business Ratios	 575
B.1	The Balance Sheet	575
B.2	Income Statement and Cost of Goods Sold Statement	576
B.3	Business Ratios	577
 Appendix C	 Code of Ethics for Engineers	 580
 Appendix D	 Alternate Methods for Equivalence Calculations	 583
D.1	Using Programmable Calculators	583
D.2	Using the Summation of a Geometric Series	584
 Appendix E	 Glossary of Concepts and Terms	 587
E.1	Important Concepts and Guidelines	587
E.2	Symbols and Terms	590
 <i>Reference Materials</i>	 <i>593</i>	
<i>Factor Tables</i>	<i>595</i>	
<i>Index</i>	<i>624</i>
