

Contents at a glance

	<i>Introduction</i>	<i>xxiii</i>
CHAPTER 1	Basic worksheet modeling	1
CHAPTER 2	Range names	9
CHAPTER 3	Lookup functions	21
CHAPTER 4	The INDEX function	29
CHAPTER 5	The MATCH function	33
CHAPTER 6	Text functions and Flash Fill	39
CHAPTER 7	Dates and date functions	57
CHAPTER 8	NPV and XNPV functions	65
CHAPTER 9	IRR, XIRR, and MIRR functions	71
CHAPTER 10	More Excel financial functions	77
CHAPTER 11	Circular references	89
CHAPTER 12	IF, IFERROR, IFS, CHOOSE, and SWITCH functions	93
CHAPTER 13	Time and time functions	115
CHAPTER 14	The Paste Special command	121
CHAPTER 15	Three-dimensional formulas and hyperlinks	127
CHAPTER 16	The auditing tool and the Inquire add-in	133
CHAPTER 17	Sensitivity analysis with data tables	143
CHAPTER 18	The Goal Seek command	155
CHAPTER 19	Using the Scenario Manager for sensitivity analysis	161
CHAPTER 20	The COUNTIF, COUNTIFS, COUNT, COUNTA, and COUNTBLANK functions	167
CHAPTER 21	The SUMIF, AVERAGEIF, SUMIFS, AVERAGEIFS, MAXIFS, and MINIFS functions	175
CHAPTER 22	The OFFSET function	181
CHAPTER 23	The INDIRECT function	193
CHAPTER 24	Conditional formatting	203
CHAPTER 25	Sorting in Excel	229
CHAPTER 26	Excel tables and table slicers	237
CHAPTER 27	Spin buttons, scrollbars, option buttons, check boxes, combo boxes, and group list boxes	253
CHAPTER 28	The analytics revolution	263
CHAPTER 29	An introduction to optimization with Excel Solver	269

CHAPTER 30	Using Solver to determine the optimal product mix	273
CHAPTER 31	Using Solver to schedule your workforce	283
CHAPTER 32	Using Solver to solve transportation or distribution problems	289
CHAPTER 33	Using Solver for capital budgeting	295
CHAPTER 34	Using Solver for financial planning	303
CHAPTER 35	Using Solver to rate sports teams	309
CHAPTER 36	Warehouse location and the GRG Multistart and Evolutionary Solver engines	313
CHAPTER 37	Penalties and the Evolutionary Solver	321
CHAPTER 38	The traveling salesperson problem	327
CHAPTER 39	Importing data from a text file or document	331
CHAPTER 40	Get & Transform	337
CHAPTER 41	Geography and Stock data types	345
CHAPTER 42	Validating data	351
CHAPTER 43	Summarizing data by using histograms and Pareto charts	359
CHAPTER 44	Summarizing data by using descriptive statistics	373
CHAPTER 45	Using pivot tables and slicers to describe data	391
CHAPTER 46	The Data Model	435
CHAPTER 47	Power Pivot	443
CHAPTER 48	Filled and 3D Power Maps	459
CHAPTER 49	Sparklines	471
CHAPTER 50	Summarizing data with database statistical functions	477
CHAPTER 51	Filtering data and removing duplicates	485
CHAPTER 52	Consolidating data	501
CHAPTER 53	Creating subtotals	507
CHAPTER 54	Charting tricks	513
CHAPTER 55	Estimating straight-line relationships	549
CHAPTER 56	Modeling exponential growth	557
CHAPTER 57	The power curve	561
CHAPTER 58	Using correlations to summarize relationships	567
CHAPTER 59	Introduction to multiple regression	573
CHAPTER 60	Incorporating qualitative factors into multiple regression	579
CHAPTER 61	Modeling nonlinearities and interactions	589
CHAPTER 62	Analysis of variance: One-way ANOVA	597
CHAPTER 63	Randomized blocks and two-way ANOVA	603

CHAPTER 64	Using moving averages to understand time series	613
CHAPTER 65	Winters method and the Forecast Sheet	617
CHAPTER 66	Ratio-to-moving-average forecast method	625
CHAPTER 67	Forecasting in the presence of special events	629
CHAPTER 68	An introduction to probability	637
CHAPTER 69	An introduction to random variables	647
CHAPTER 70	The binomial, hypergeometric, and negative binomial random variables	653
CHAPTER 71	The Poisson and exponential random variable	661
CHAPTER 72	The normal random variable and Z-scores	665
CHAPTER 73	Weibull and beta distributions: Modeling machine life and duration of a project	675
CHAPTER 74	Making probability statements from forecasts	681
CHAPTER 75	Using the lognormal random variable to model stock prices	685
CHAPTER 76	Importing historical stock data into Excel	689
CHAPTER 77	Introduction to Monte Carlo simulation	693
CHAPTER 78	Calculating an optimal bid	703
CHAPTER 79	Simulating stock prices and asset-allocation modeling	709
CHAPTER 80	Fun and games: Simulating gambling and sporting event probabilities	717
CHAPTER 81	Using resampling to analyze data	725
CHAPTER 82	Pricing stock options	729
CHAPTER 83	Determining customer value	741
CHAPTER 84	The economic order quantity inventory model	747
CHAPTER 85	Inventory modeling with uncertain demand	753
CHAPTER 86	Queuing theory: The mathematics of waiting in line	759
CHAPTER 87	Estimating a demand curve	765
CHAPTER 88	Pricing products by using tie-ins	771
CHAPTER 89	Pricing products by using subjectively determined demand	777
CHAPTER 90	Nonlinear pricing	783
CHAPTER 91	Array formulas and functions	791
CHAPTER 92	Recording macros	811
CHAPTER 93	Advanced sensitivity analysis	823
	<i>Index</i>	825
