Preface xvii

Chapter 1

Introduction 2

MANAGEMENT SCIENCE/OPERATIONS RESEARCH (MS/OR) AND ITS SUPPORTING INFORMATION SYSTEMS

- 1 Management science/operations research: the quantitative approach to management decision making 4
- 2 The development of scientific management: from industrial engineering to management science/operations research 4
- 3 Early management science/operations research 5
- 4 Management science/operations research today 8
- 5 The relationship between the MS/OR practitioner and the manager 9
- 6 Applications of management science/operations research 9
- 7 Opportunities and shortcomings of the quantitative approach 12
- 8 How do you define a good MS/OR solution? 13
- 9 Quantitative methods to be discussed 14
- 10 MS/OR and the computer 15
- 11 Decision support systems 19
- 12 Artificial intelligence and expert systems 20
- 13 Glossary 23
- 14 Exercises 24
- 15 Chapter concepts quiz 24

Chapter 2

A Review of Probability Concepts 30

- 1 Introduction 32
- 2 Basic probability concepts 32

3	Three types of probability	33
4	Probability rules	34
5	Probabilities under conditions of statistical independence	38
6	Probabilities under conditions of statistical dependence	43
7	Revising prior estimates of probabilities: Bayes' theorem	49
8	The concept of probability distributions	52
9	Random variables	54
10	The binomial distribution	57
11	The Poisson distribution	63
12	The exponential distribution	65
13	The normal distribution	67
14	Glossary	78
15	Review of equations	80
16	Exercises	82
17	Chapter concepts quiz	88
18	Real world MS/OR successes	93
19	Computer applications at Optimization Unlimited	94

SPREADSHEET MODELS: BINOMIAL, POISSON, EXPONENT, AND NORMAL 98

Chapter 3

Forecasting 102

1	Introduction	104
2	Judgmental forecasting	105
3	Time-series patterns	107
4	Evaluating forecast accuracy	107
5	Moving averages	110
6	Simple exponential smoothing	112
7	Time-series regression	115
8	Smoothing linear trends	118
9	Smoothing nonlinear trends	121
10	Decomposition of seasonal data	125
11	Forecasting with the PC	131
12	Glossary	135
13	Review of equations	136
14	Exercises	138
15	Chapter concepts quiz	144
16	Real MS/OR successes	147
17	Computer applications at Optimization Unlimited	148

SPREADSHEET MODELS: SIMPLE, TREND, DESMON, AND DESQTR 152

Chapter 4

Decision Making Using Probabilities I 159

DECISION ENVIRONMENTS, DATA SOURCES, DECISION CRITERIA,
USING EXPERIENCE

- 1 Introduction to decision making 160
- 2 Steps in decision making 160
- 3 The different environments in which decisions are made 161
- 4 The criteria for decision making under uncertainty 162
- 5 Decision making under conditions of risk: discrete random variables 165
- 6 Using the expected value criterion with continuously distributed random variables 181
- 7 Supplying the numbers 182
- 8 Combining experience and numbers 184
- 9 Utility as a decision criterion 187
- 10 Glossary 191
- 11 Review of equations 192
- 12 Exercises 193
- 13 Chapter concepts quiz 204
- 14 Real world MS/OR successes 208
- 15 Computer applications at Optimization Unlimited 209

SPREADSHEET MODELS: EXPVALUE, CRITERIA, MARGINAL,
ODDS, AND COMBINED 212

Chapter 5

Decision Making Using Probabilities II 219

THE NORMAL DISTRIBUTION AND COST-VOLUME-PROFIT ANALYSIS,
COMBINING MONEY AND PROBABILITIES, REPLACEMENT ANALYSIS,
DECISION TREES, GAME THEORY

- 1 The normal probability distribution and cost-volume-profit analysis 220
- 2 Combining unit monetary values and probability distributions 222
- 3 Replacement analysis: items which fail over time 228
- 4 Decision trees: graphic displays of the decision-making process 231
- 5 Decision making with an active opponent 241
- 6 Glossary 250
- 7 Review of equations 251
- 8 Exercises 251
- 9 Chapter concepts quiz 260
- 10 Real world MS/OR successes 264
- 11 Computer applications at Optimization Unlimited 265

SPREADSHEET MODELS: UNITLOSS, REPLACE, AND GAME 270

Chapter 6

Inventory I 275

ORDER QUANTITY MODELS

1	What functions does inventory perform?	276
2	Inventory decisions	277
3	Selective approach to managing inventory (ABC analysis)	277
4	Economic order quantity: the basic "how much to buy" model	279
5	How to eliminate the instantaneous receipt assumption in EOQ models	285
6	Using EOQ models when annual demand cannot be forecast	288
7	Using EOQ models when cost information is not available	289
8	Applying the EOQ model to production processes	295
9	Some conclusions about EOQ models	298
10	Glossary	300
11	Review of equations	300
12	Exercises	302
13	Chapter concepts quiz	314
14	Real world MS/OR successes	315
15	Computer applications at Optimization Unlimited	315
SPREADSHEET MODELS: EOQ, RECEIPT, NOCOST, AND PRODLT		318

Chapter 7

Inventory II 322

REORDERING, BACKORDERS, DISCOUNTS, MATERIAL REQUIREMENTS PLANNING

1	Deciding when to buy: introduction	324
2	How to determine the optimal level of safety stock when out-of-stock costs are known	325
3	Setting safety stock levels when out-of-stock costs are not known	328
4	Joint ordering: more than one SKU from the same supplier simultaneously	333
5	Reordering with planned stockout	336
6	How to evaluate quantity discounts offered by suppliers	342
7	Material requirements planning (MRP)	345
8	Glossary	350
9	Review of equations	351
10	Exercises	352
11	Chapter concepts quiz	363
12	Real world MS/OR successes	368
13	Computer applications at Optimization Unlimited	369
SPREADSHEET MODELS: ROP, SERVICE, BACKORDE, AND QTYDISCO		372

Chapter 8

Linear Programming I: Solution Methods 376

GRAPHIC METHOD AND USING THE COMPUTER

- 1 Introduction 378
- 2 Graphic method to solve linear programs 379
- 3 Some technical issues in linear programming 392
- 4 Using the computer to solve linear programs 392
- 5 Glossary 405
- 6 Exercises 406
- 7 Chapter concepts quiz 412
- 8 Real world MS/OR successes 416
- 9 Computer applications at Optimization Unlimited 417

Chapter 9

Linear Programming II: The Simplex Method 420

MAXIMIZATION AND MINIMIZATION

- 1 Setting up the initial solution 422
- 2 Developing the second solution 426
- 3 Developing the third solution 430
- 4 Justification and significance of all elements in the simplex tableau 432
- 5 Minimization problems and equal-to or greater-than-or-equal-to constraints 437
- 6 Some technical issues in the simplex method 442
- 7 Glossary 446
- 8 Exercises 447
- 9 Chapter concepts quiz 450
- 10 Real world MS/OR successes 455

Chapter 10

Linear Programming III: Building LP Models and Interpreting Solutions 456

PROBLEM FORMULATION, DUALITY, SENSITIVITY ANALYSIS, LINEAR PROGRAMMING APPLICATIONS

- 1 Building models 458
- 2 The dual in linear programming 465

3	Shadow prices and reduced costs	469
4	Right-hand-side and objective ranging	471
5	Pricing out new variables	481
6	Sensitivity analysis with the simplex algorithm	484
7	Linear programming applications	487
8	Glossary	494
9	Exercises	495
10	Chapter concepts quiz	511
11	Real world MS/OR successes	511
12	Computer applications at Optimization Unlimited	516

Chapter 11

Specially Structured Linear Programs 518

TRANSPORTATION AND ASSIGNMENT PROBLEMS

1	The transportation problem (demand equals supply)	520
2	The transportation problem (demand does not equal supply)	544
3	Degeneracy	546
4	Initial solutions by the greedy method and by Vogel's method	550
5	The assignment problem	558
6	Solving maximization problems with transportation and assignment methods	565
7	Using the computer to solve assignment and transportation problems	570
8	Glossary	571
9	Review of equations	572
10	Exercises	573
11	Chapter concepts quiz	584
12	Real world MS/OR successes	589
13	Computer applications at Optimization Unlimited	589

Chapter 12

Networks 595

PERT, CPM, PERT/COST, SCHEDULING WITH RESOURCE LIMITATIONS, MAXIMAL-FLOW PROBLEM, MINIMAL-SPANNING-TREE PROBLEM, SHORTEST-ROUTE PROBLEM, DYNAMIC PROGRAMMING

1	PERT (program evaluation and review technique)	596
2	CPM (critical path method)	608
3	PERT/Cost	618
4	Network scheduling with resource limitations	620

5	The maximal-flow problem	625
6	The minimal-spanning-tree problem	627
7	The shortest-route problem	631
8	Dynamic programming	634
9	Glossary	639
10	Review of equations	641
11	Exercises	642
12	Chapter concepts quiz	657
13	Real world MS/OR successes	661
14	Computer applications at Optimization Unlimited	662
SPREADSHEET MODELS: CRITPATH		664

Chapter 13

Extensions of Linear Programming 667

1	Integer programming formulations	668
2	Cutting plane method	675
3	Branch-and-bound method	679
4	Heuristics	684
5	Goal programming	686
6	Glossary	691
7	Exercises	692
8	Chapter concepts quiz	702
9	Real world MS/OR successes	706
10	Computer applications at Optimization Unlimited	707

Chapter 14

Waiting Lines 711

1	Introductory queuing ideas	712
2	Queuing objectives and cost behavior	714
3	Standard language and definitions for waiting lines	716
4	Elementary queuing system: constant arrival and service times	719
5	Single-channel queuing model: Poisson-distributed arrivals and exponentially distributed service times	720
6	Single-channel queuing model: Poisson-distributed arrivals and any service-time distribution	722
7	Single-channel queuing model: Poisson-distributed arrivals, exponentially distributed service times, and finite waiting capacity	724
8	Multiple-channel queuing model: Poisson-distributed arrivals and exponentially distributed service times	726
9	The limitations of queuing theory	728

10	Simulation of a queuing system	728	
11	Comparing the simulation solution with a formula solution		735
12	Glossary	737	
13	Review of equations	738	
14	Exercises	740	
15	Chapter concepts quiz	746	
16	Real world MS/OR successes	750	
17	Computer applications at Optimization Unlimited		751
SPREADSHEET MODELS: SINGQ AND MULTIQ			754

Chapter 15 Simulation 757

1	Introduction	758	
2	Simulation in practice	760	
3	A hand-computed simulation		763
4	Computer simulation	767	
5	Using heuristics in simulation		776
6	Glossary	780	
7	Exercises	780	
8	Chapter concepts quiz	792	
9	Real world MS/OR successes	797	
10	Computer applications at Optimization Unlimited		798

Chapter 16 Markov Analysis 801

1	Introduction to brand-switching analysis	802	
2	A matrix algebra primer	804	
3	Prediction of market shares for future periods		809
4	Equilibrium conditions	816	
5	Use of Markov analysis in marketing strategy		821
6	Other uses of Markov analysis	823	
7	Glossary	828	
8	Exercises	829	
9	Chapter concepts quiz	840	
10	Real world MS/OR successes	844	
11	Computer applications at Optimization Unlimited		845
SPREADSHEET MODELS: MARKOV AND EQUILIBR			848

Chapter 17

MS/OR: Past, Present and Future 853

- 1 Phases of growth 854
- 2 Extent of use of quantitative methods in organizations, 1970s and 1980s 855
- 3 International experiences with MS/OR: A sampler 858
- 4 Thirty years of airline industry MS/OR applications: results and trends 860
- 5 Improving the long-run success of MS/OR 861
- 6 The future of MS/OR 863

Appendixes

- 1 The Standard Normal Probability Distribution 866
- 2 The Cumulative Binomial Distribution 868
- 3 Unit Normal Loss Integral 886
- 4 Values of $e^{-\lambda}$ for Computing Poisson Probabilities 888
- 5 Values of P_0 889
- 6 Random Numbers Table (2500 random digits) 891
- 7 Derivation of EOQ Formulas 893
- 8 Functional list of Text Exercises 895

Answers to Chapter Concepts Quizzes 899

Bibliography 905
