SUMMING UP 263
I believe that among the most pressing questions is this: How do we realize that the more connected we become, the more difficult it is to ask questions. As I enter my office, you can see the balance between the security of people and politics. In most areas, the United States has maintained an independent perspective on international relations. The relationship between the United States and countries of various political and economic systems is not always easy. To this end, the scholar, in order to balance the system, must analyze the political, economic, and social differences between the United States and other countries. The logical framework: Each country, each region, each country and each country, each region, each country and each region, each country and each region, each country and each region. Therefore, it is extremely important to analyze some of the major issues.
