GENERAL INTRODUCTION

Basic Computer Setup	14
Graphics Programs	15
Choosing a Program	19
Starting to Draw	19
Creating a Shape	22
Achieving a Composite Shape ...	25
Establishing Repetition	27
Establishing Radiation	31
Establishing Gradation	31
Establishing Similarity	33
Active and Visible Structures	35
Representational Forms	36
Three-Dimensional Images ...	36
Getting on with the Main Text ..	37

TWO-DIMENSIONAL DESIGN

1. INTRODUCTION

What is Design	41
The Visual Language	41
Interpreting the Visual Language	41
Elements of Design	42
Conceptual Elements	42
Visual Elements	42
Relational Elements	43
Practical Elements	44
The Frame of Reference	44
The Picture Plane	44
Form and Structure	44

2. FORM

Form and the Conceptual	
Elements	45
Form as Point	45
Form as Line	45
Form as Plane	45
Form as Volume	47
Positive and Negative Forms ..	47

Form and Color Distribution	47
The Interrelationships of Forms ..	49
Spatial Effects in Form	
Interrelationships	49

3. REPETITION

Unit Forms	51
Repetition of Unit Forms	51
Types of Repetition	51
Variations in Repetition	51
Subunit Forms and Superunit	
Forms	53
The Encounter of Four Circles ...	53
Repetition and Reflection	54
Notes on the Exercises	54

4. STRUCTURE

Formal Structure	59
Semi-formal Structure	59
Informal Structure	59
Inactive Structure	59
Active Structure	59
Invisible Structure	61
Visible Structure	61
Repetition Structure	61
The Basic Grid	61
Variations of the Basic Grid ..	63
Multiple Repetition Structures ..	63
Unit Forms and Structural	
Subdivisions	65
Repetition of Position	65
Superimposition of Repetition	
Structures	66
Notes on the Exercises	66

5. SIMILARITY

Similarity of Unit Forms	69
Similarity of Shape	69
Similarity and Gradation	71
The Similarity Structure	71
Notes on the Exercises	71

6. GRADATION

Gradation of Unit Forms	75
Planar Gradation	75

Spatial Gradation	75
Shape Gradation	77
The Path of Gradation	77
The Speed of Gradation	77
Patterns of Gradation	79
The Gradation Structure	79
Alternate Gradation	81
Relationship of Unit Forms and Structures in a Gradation Design	82
Notes on the Exercises	82

7. RADIATION

Characteristics of a Radiation Pattern	87
The Radiation Structure	87
The Centrifugal Structure	87
The Concentric Structure	88
The Centripetal Structure	90
Superimposition of Radiation Structures	90
Radiation and Repetition	90
Radiation and Gradation	90
Structural Subdivisions and Unit Forms	93
Unit Forms in Radiation	93
Oversize Unit Forms	93
Irregular and Distorted Radiation	94
Notes on the Exercises	94

8. ANOMALY

Anomaly among Unit Forms	99
Anomaly within Structures	101
Notes on the Exercises	101

9. CONTRAST

Contrast, Regularity, and Anomaly	105
Contrast of Visual and Relational Elements	105
Contrast within a Form	107
The Contrast Structure	109
Dominance and Emphasis	109
Notes on the Exercises	111

10. CONCENTRATION

Concentration of Unit Forms in Formal Structures	113
The Concentration Structure	114
Unit Forms in Concentration Structures	114
Notes on the Exercises	117

11. TEXTURE

Visual Texture	119
The Making of Visual Texture	119
Collage	121
Tactile Texture	122
Light and Color in Tactile Texture	122
Notes on the Exercises	123

12. SPACE

Positive and Negative Space	127
Flat and Illusory Space	127
Flat Forms in Illusory Space	127
Volume and Depth in Illusory Space	129
Plane Representation in Illusory Space	129
Fluctuating and Conflicting Space	131
Notes on the Exercises	131

TWO-DIMENSIONAL FORM

1. ASPECTS OF FORM

Form	138
Three-Dimensional Form	138
Two-Dimensional Form	139
Form and Shape	139
Frame of Reference	141
Form and Space	141
The Visualization of Form	142
Visualization with Lines	143
Visualization with Planes	143
Visualization with Lines and Planes	144

Visualization with Points	145
Visualization with Texture	145
Types of Forms	146
Representational Forms	146
Natural Forms	147
Man-made Forms	147
Verbal Forms	148
Abstract Forms	148
Types of Shapes	149
Calligraphic Shapes	149
Organic Shapes	150
Geometric Shapes	150

2. DESIGNING A FORM

Design and Form	152
Singular Forms	152
Plural Forms	153
Compound Forms	153
Unit Forms	154
Superunit Forms	154
Creating Geometric Shapes	155
Straight Lines	155
Circles	156
Arcs	156
Relating Straight Lines	157
Relating Circles	158
Relating Arcs	159
Relating Straight Lines, Circles, and Arcs	160
Angles and Pointed Tips	161
The Addition of Planes	162
The Subtraction of Planes	163
The Interpenetration of Planes	163
The Multiplication of Planes	164
The Division of Planes	165
Varying the Size of Planes	166
The Transformation of Planes	167
Folding Planes	168
Establishing Volume	168
Regularity	169
Deviation	170
Symmetry	170
Asymmetry	171
Creating Organic Shapes	172

C & S Curves	172
Shapes with Pointed Tips	173
Shapes with Rounded Tips	173
The Joining and Linking of Shapes	174
The Splitting, Tearing, and Breaking of Shapes	174
Cutting and Removing Parts of Shapes	175
The Curling and Twisting of Shapes	175
The Rippling and Creasing of Shapes	176
The Inflation and Deflation of Shapes	176
The Metamorphosis and Deformation of Shapes	177
The Proliferation of Shapes	177
Symmetrical Expression	178
Variations of a Form	179
Internal Variation	179
External Variation	180
Extension	180
Superimposition	181
Transfiguration	181
Dislocation	182
Distortion	182
Three-Dimensional Manipulation	183
Further Developments	184

3. REPRESENTATIONAL FORMS

Forms and Subjects	186
Observing Natural Forms	186
Branching and Fanning	187
Spirals and Undulations	187
Affinity and Unity	188
Observing Man-made Forms	188
Materials and the Assembly of Parts	189
Plans, Elevations and Perspectives	189
Self-Contained Compositions	190
Establishing Singular Forms	190

Establishing Plural Forms	192
Establishing Compound Forms	196
Compositions with Repetition	198
Two-way Continuance	198
Four-way Continuance	199
Six-way Continuance	202
Development and Variations of the Repetition Structure	203
Compositions with Radiation	207
Full and Segmentary Radiation	207
Rotation and Translation	208
Rotation and Reflection	209
Rotation and Dilation	209
The Interception of Active Structural Lines	210
Compositions with Gradation	212
Gradation of Shape	212
Gradation of Size	213
Gradation of Position	213
Gradation of Direction	214
Gradation of Proportion	215
Compositions with Similarity	216
Similarity and Repetition	218
Similarity and Radiation	218
Similarity and Gradation	219
Compositions with Concentration	219
Points of Concentration	220
Linear Concentration	221
Planar Concentration	222
Compositions with Contrast	223
Contrast of Appearance	223
Contrast of Placement	226
Contrast of Quantity	228
Compositions with Anomaly	230
Anomaly in Shape	230
Anomaly in Size	231
Anomaly in Color	232

Anomaly in Texture	232
Anomaly in Position and Direction	233

THREE-DIMENSIONAL DESIGN

1. INTRODUCTION

The Two-Dimensional World	237
The Three-Dimensional World	237
Two-Dimensional Design	238
Three-Dimensional Design	238
The Three Primary Directions	239
The Three Basic Views	240
Elements of Three-Dimensional Design	241
Conceptual Elements	241
Visual Elements	242
Relational Elements	244
Constructional Elements	245
Form and Structure	246
Unit Forms	246
Repetition and Gradation	246

2. SERIAL PLANES

Serial Planes	247
Dissection of a Cube	248
Positional Variations	249
Directional Variations	250
Construction Techniques	251

3. WALL STRUCTURES

Cube, Column and Wall	259
Spatial Cells and Unit Forms ..	260
Positional Variations of Unit Forms	261
Directional Variations of Unit Forms	262
Unit Forms as Distorted Planes	263
Wall Structures Not Remaining Flat	263

Modifications of Spatial Cells ...	Joints316
.....264	Components for Linear
	Framework317
4. PRISMS AND CYLINDERS	Repetition of the Linear
The Basic Prism and Its Variations	Framework318
.....271	Stacking of Repeated Units ..319
The Hollowed Prism272	Addition and Subtraction319
Treatment of the Ends272	Interpenetration320
Treatment of the Edges273	
Treatment of the Faces274	9. LINEAR LAYERS
Joining of Prisms274	Building up of Linear Layers ..324
The Prism and the Cylinder ..276	Variations and Possibilities ...325
Variations of a Cylinder277	Gradation of Shape in Layer
	Construction326
5. REPETITION	
Repetition of Unit Forms284	10. INTERLINKING LINES
Repetition Structure285	Interlinking Lines on a Flat
Arrangements of the Layers ..286	Plane333
Organization Within Each Layer	Interlinking Lines in Space334
.....286	Materials and Construction336
Joining of Unit Forms287	Planar Construction for
Square Prisms as Unit Forms or	Interlinking Lines336
Spatial Cells288	Interlinking Lines Within a
L-Shape Unit Form or Spatial Cell	Transparent Cube337
.....288	
Unit Forms in a Repetition	GLOSSARY345
Structure289	
6. POLYHEDRAL STRUCTURES	INDEX349
The Platonic Solids295	
The Archimedean Solids297	
Face Treatment299	
Edge Treatment299	
Vertex Treatment300	
Joining of Polyhedral Shapes ..300	
7. TRIANGULAR PLANES	
Equilateral Triangles307	
Isosceles Triangles308	
Unequal-sided Triangles309	
The Octet System309	
8. LINEAR FRAMEWORK	
Construction with Planes315	
Construction with Lines315
