Daftar Isi

Sambutan Dekan Fakultas Ekonomi dan Bisnis
Universitas Indonesia .............................................................. iii
Kata Pengantar ................................................................. v
Ucapan Terima Kasih ............................................................. vii
Daftar Isi ............................................................................. ix

BAGIAN A KONSEP STRUCTURAL EQUATION MODELING ............

Bab 1. PENDAHULUAN ......................................................... 1
1.1. Sekilas Perkembangan Structural Equation Model (SEM) .......... 1
1.2. SEM dan Multivariat ........................................................ 12
1.3. Garis Besar Isi Buku ......................................................... 14

Bab 2. KONSEP SEM ............................................................ 15
2.1. Pendahuluan ................................................................. 15
2.2. Variabel-variabel dalam SEM .......................................... 16
2.3. Model-Model dalam SEM ................................................ 18
2.4. Kesalahan-Kesalahan dalam SEM ....................................... 24
2.5. Bentuk Umum SEM (Full atau Hybrid Model) ................... 25
2.6. Path Model .................................................................... 32
2.7. Confirmatory Factor Analysis (CFA) .................................. 33
2.8. Direct, Indirect dan Total Effect ........................................ 37

Bab 3. PROSEDUR SEM ....................................................... 39
3.1. Orientasi dalam SEM ...................................................... 39
3.2. Hipotesis Fundamental ..................................................... 41
3.3. Tahapan dalam Prosedur SEM ......................................... 42
3.4. Spesifikasi Model ........................................................... 43
3.5. Identifikasi ................................................................. 46
3.6. Estimasi ................................................................. 51
3.7. Uji Kecocokan ............................................................ 57

Dedikasi

Suci tercinta:
Anie, Rina, Rio, Rama,
Cory, Ary
Rakha, Aira
