# TABLE OF CONTENTS

**Chapter 1 - Blender user interface and 3D navigation**  14

1.1 First time with Blender  15
1.1.1 Splitting and managing editors  20
1.1.2 Using WorkSpaces  23
1.2 Saving files and reusing content  26
1.3 Active editor and shortcuts  30
1.4 3D Navigation and zoom controls  31
1.5 Object selection  36
1.6 The 3D Cursor  41
1.6.1 Moving the 3D Cursor  42
1.6.2 Using the Snap for the 3D Cursor  45
1.7 Using the status bar  48
What is next?  52

**Chapter 2 - Object creation and manipulation**  53

2.1 Creating objects in Blender  55
2.2 Object transformations  62
2.2.1 Duplicating objects  66
2.2.2 Numeric transformations  68
2.3 Undoing and Redoing in Blender  72
Chapter 2 - Work modes

2.4 Work modes
2.5 Object origins
2.5.1 Pivot points and transformations
2.6 Object collections
2.6.1 Renaming objects

What is next?

Chapter 3 - Tools for 3D modeling

3.1 X-Ray and shading modes for modeling
3.1.1 Shading modes
3.2 Extrude for polygon modeling
3.2.1 Extrude modes
3.3 Loop cut
3.3.1 Loop cut and Extrude Manifold
3.4 Creating new edges and faces from vertices
3.4.1 Connecting faces with the Bridge faces
3.5 Separating and joining models
3.5.1 Joining models
3.6 Merging vertices
3.6.1 Fixing extrudes with the Merge
3.7 Using the Mirror tool for modeling

What is next?

Chapter 4 - Modeling techniques and resources

4.1 Modifiers for modeling
4.2 Subdivision Surface modifier 150
4.2.1 Controlling surface smoothing 154
4.2.2 Fixing smoothing problems 157
4.2.3 Controlling smoothing radius with loops 162
4.3 Mirror modifier 164
4.4 Array modifier 168
4.4.1 Arrays and reference objects 172
4.5 Boolean modifier 175
4.6 Spin tool for rounded shapes 178
4.7 Proportional editing 183
What is next? 186

Chapter 5 - Materials and textures 187
5.1 Adding materials to objects 189
5.2 Material editor and shaders 193
5.2.1 The Shader Editor 198
5.3 Using image textures 205
5.3.1 Projection for image textures 207
5.3.2 Tilling for image textures 208
5.4 PBR textures in Blender 211
5.5 Transparent and glass materials 219
5.6 Glossy surfaces 221
5.7 Attaching textures to the Blender file 222
5.8 Using multiple materials 225
Chapter 6 - Rendering and illumination

6.1 Rendering and shading modes
6.1.1 Shading modes
6.2 Working with cameras
6.2.1 Align the camera to view
6.3 Rendering scenes
6.4 Saving a render
6.4.1 Image settings for rendering
6.5 Environmental lights
6.6 Illumination and types of lights
6.7 Quick setup for rendering
6.7.1 Quick setup for render with Eevee
6.7.2 Quick setup for render with Cycles

Chapter 7 - Animation and motion with Blender

7.1 How to make an animation with Blender
7.1.1 Adding keyframes to objects
7.1.2 Removing and updating keyframes
7.1.3 Timeline navigation
7.2 Creating a simple animation
7.3 Managing animation timing
7.4 Controlling animation with curves
7.5 Hierarchies for animations 312
7.6 Constraints for animations 317
7.6.1 Making an arm grab an object 319
What is next? 327

Chapter 8 - Animation rendering and composition 328
8.1 Following an object with the camera 330
8.1.1 Making an object following a path 332
8.2 Creating animation loops 336
8.2.1 Using modifiers in the Graph Editor 338
8.3 Organizing projects in scenes 341
8.4 Rendering animation 343
8.4.1 Rendering as a video file 346
8.5 Editing and exporting video 353
8.5.1 Editing video 358
8.5.2 Exporting video 361
8.5.3 Converting image sequences to video 362
8.6 Adding titles and text 363
What is next? 366
