Abstract

Objectives As a developing country, Indonesia growth has been rapidly increasing. The demand for housing and business land for the people created many opportunities. To be able to compete in the industry, business information system is needed. The implementation of the business information system requires business process reengineering. This paper is the implementation of business process reengineering on the company PT Suryacendra Puramegah

Method This paper uses real business case from the company and model the business cases into a standardize business model. As for research methodology, an interview with the president director is conducted through casual daily conversations. As for the framework, this project use Business Process Management Implementation framework by Jesten and Nelis

Results This paper will result in an increase of the performance by the company and making it into a modern company that has technology applied into the business process. Business processes will be altered to be more efficient

Conclusion Based on the business process implementation framework and through research and analyzing of the business processes. The result is will be shown after implementation is done.

Key words: Business Process Reengineering, Information Systems, Activity Diagram, BPM Foundation
