

## **CHAPTER 5**

### **CONCLUSION AND SUGGESTION**

#### **5.1 Conclusion**

Based on our thesis, it can be concluded as follow:

1. The website can help QLab to show Mecmesin's products online. Beside, It's give more details about the products. When customer open this website, they will easily locate the product list, how to order, where QLab is.
2. The website can help QLab to simplify their transaction with customer. This website can shorten the time of transaction. It's simpler than manual transaction. Fulfill Q-Lab's company's duty as Mecmesin seller in Indonesia.
3. The website provides tracking order features. From this website, if user bought a product and they want to know the current process or current location of their product, they can go to this website.
4. The website can easily monitored by Admin from QLab. This website was designed for Admin to easily maintained by them. Start from signup and login page, managing order, and also monitored the order on its order history.
5. The website provides enquiry form, so that if there is a new customer that does not know about Mecmesin's products, they can fill the enquiry form about the details of what kind of product they want to order, and QLab will choose what product that suits them best.

#### **5.2 Suggestion**

Based on the results and implementation of this website development, there are several suggestions for future developments, such as:

1. The UI design of this website can be improved. The layout and its color can be improved based on Q-Lab's new specification later. For example, if Q-Lab changed its logo or color scheme, the UI design can also changed.

- 
2. Provide notification or warning system for current order. This can be improved on next implementation for easily monitored the website. Notification will make admin of its website faster to do their action.
